THE COOKED WORKS

Cooked FX Environment & Emotes (FREE) - License

Terms of use

You can

- Use the files in an **unlimited number of projects**: games, apps, software, websites, videos, streams, presentations and the marketing material for those projects.
- **Modify** them: recolor, resize, crop, combine, convert or edit them in any way.
- **Sell and distribute finished products** that contain them (for example a game on Steam, itch.io, console or mobile stores).
- Share them with **team members working on the same project** (see the license tiers below).

You cannot

- **Resell, redistribute, share, sublicense or give away** the files on their own, original or modified. This includes uploading them to any asset store, marketplace, icon or font library, repository or file-sharing service.
- Include them in **another asset pack, icon set, UI kit, template, font collection or any product** whose main purpose is to provide resources to other creators.
- **Claim** them as your own work, or register them as part of a **logo or trademark**.

Using the files inside a finished project is fine even if a player could technically extract them. What is not allowed is offering the assets themselves as a resource for others.

License tiers

This is a **free** package. The same rights and restrictions apply as to the paid packs, there is just no purchase. On Fab and the Unity Asset Store the store's own license terms apply as well.

Credit

Credit is **not required**, but always appreciated: *"Effects: Cooked FX by The Cooked Works"*

AI disclosure

This pack was created with the help of generative AI (AI-written drawing code). Every asset was reviewed, corrected and curated by The Cooked Works.

Conflicts

If this document conflicts with the license of the store where you got the package, the store's license (Fab Standard License or Unity Asset Store EULA) prevails for that copy.

No warranty

The files are provided "as is", without warranty of any kind. In no event shall the author be liable for any claim, damages or other liability arising from their use.
